**To:**

HR Manager/ Recruiter Team

**Hi,**

First of all, thanks for your time and consideration.

It's a great opportunity to apply for the Software Engineer (Python Developer) post in your organization. After reviewing your job descriptions, it's clear that you're looking for a candidate that is extremely familiar with the responsibilities associated with the role and can perform them confidently.

Given these requirements, I am certain that I have the necessary skills to successfully do the job adeptly and meet the above expectations.

I am a result-oriented associate, currently working as IT Analyst in Tata Consultancy Services (from November 2018).

During my academic career, while working on academic and extra-curricular projects, I have developed problem-solving, multitasking, critical thinking abilities, which I hope to leverage into the Software Engineering role at your company.

I have keen interests in Programming Languages & Algorithms (in C, Python & Java), Data Structure etc. I want to enrich my knowledge about these fields & also want to explore the fields of new advanced technologies by proper guidance & experience, and this can be achieved only when an opportunity is given to serve your industry. I'm a quick learner, so learning new technologies is not going to be hard for me.

After reviewing my resume, I hope you will agree that I am the type of competent and competitive candidate you are looking for. I have enclosed my resume with details of personal IT proficiency, skills & endorsements for your consideration.

I look forward to elaborating on how my specific skills and abilities will benefit the organization. Please let me know if you have any queries.

You can contact me at **(+91)8972634617** and via email at **[sudipsahu17@gmail.com](mailto:sudipsahu17@gmail.com)** for further queries.

Thank you for your kind consideration, and I look forward to hearing from you soon.

**Thanks and Regards,**  
**Sudip Kumar Sahu**
